Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-2 are rejected under 35 U.S.C. 102 (b) as being anticipated by Ohsuga et al. (Ohsuga) (Patent Number 5,233,831).

Regarding claim 1, Ohsuga discloses an exhaust gas purifying system for an internal combustion engine (1), comprising a first exhaust gas purifying device (e.g. 4, 5) composed of a NO_x occlusion reduction type catalyst arranged in the exhaust passage of an internal combustion

Art Unit: 3748

engine, and also comprising the respective oxygen concentration sensors (7, 8) arranged at the upstream and downstream of the first exhaust gas purifying device (e.g. 4, 5), and which controls to end the rich control when a difference between the oxygen concentrations detected by both of said oxygen concentration sensors falls not higher than a predetermined judgment value during the rich control for restoring the catalytic ability of the first exhaust gas purifying device, wherein a second exhaust gas purifying device (5) for purifying HC and CO is arranged at the downstream of said first exhaust gas purifying device (e.g. See col. 4, lines 2-67; col. 5, lines 1-67).

Regarding claim 2, Ohsuga further discloses that the second exhaust gas purifying device is composed of any one of the NO_x occlusion reduction type catalyst, a DPF supporting thereon the NO_x occlusion reduction type catalyst, a three-way catalyst, and an oxidation catalyst with an oxygen occlusion function, or composed of a combination of some of these (e.g. See col. 3, lines 45-65).

Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure and consists of five patents:

Ishizuka et al. (Pat. No. 6116023), Uchikawa (Pat. No. 5533332), Akazaki et al. (Pat. No. 5657627), Takahashi et al. (Pat. No. 6237330), and Morinaga et al. (Pat. No. 6463735) all discloses an exhaust gas purification for use with an internal combustion engine.

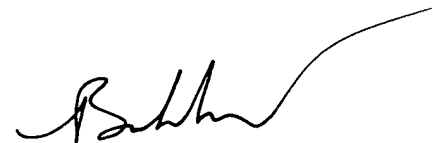

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Binh Tran whose telephone number is (571) 272-4865. The examiner can normally be reached on Monday-Friday from 8:30 a.m. to 5:00 p.m.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas E. Denion, can be reach on (571) 272-4859.
